Best Practices for Verification to Support Reduced Certificate Lifetimes

November 26, 2020 | 2:00 PM

Join us for Part 2 of our "Road to 398" webinar series that discusses upcoming certificate lifetime reductions.

During this webinar, our verification expert will share tips, tools, and best practices for verification processes that support reduced TLS/SSL certificate lifetimes and maintain compliance.

Topics covered:

- Updates on CA/Browser Forum requirements for verification around shorter certificate lifetimes
- Tools for renewing certificates in bulk with fewer touch points
- Methodologies for streamlining certificate verification
- Insights and best practices from some of our other customers

Presented by:

Dathan Demone
Director
Verification Services
